

Hammock Features – Small Flash Feature with Scroll

Flash Sample Screenshot of the small flash feature shown above

Need to be able to scroll through the icons from left to right and right to left when someone clicks on a left or right arrow and there are more than 6 icons available. The feature title and subcopy needs to appear in the same place when the icon is moused over. See above. The title and subcopy only appears when a features icon is moused over. On mouse off the title and copy goes away and the icon turns back to the original state. When the left or right arrow is clicked, the feature icons should move left or right. I would prefer a smooth movement as they move left or right versus a hard movement, I would like it to transition smoothly and glide left to right. I would like for 6 icons to appear on screen at all times, therefore when the last icon is displayed on the right you will still see 6 icons on screen... versus having a bunch of white space when scrolled all the way over... Need to make sure it is fairly easy to add or remove a features icon in case client wants to add additional ones in the future.

Hammock Features

Icon - Title and Subcopy

	LIGHTWEIGHT Only weights 1 pound (16 oz.)
	STRONG Lab certified and tested to hold up to 400lbs.
	WATER RESISTANT AND QUICK DRY Anti-mildew, anti-rot parachute nylon material sheds moisture and dries instantly in the sun.
	DURABLE Engineered for maximum breathability and durability. Meticulously triple stitched along all seams.
	GOOD FOR THE EARTH Trek Lightly... Our hammocks keep you off the ground and prevent damage to native soil and plant growth.

	<p>GO ANYWHERE! Easy to setup and transport, our hammocks are perfect for camping, backpacking, indoors or anywhere you want to go.</p>
	<p>GOOD FOR YOU, GOOD FOR YOUR SOUL Experience the benefits of a material that conforms to your body and eliminates pressure points. Trek Light hammocks are a healthy way to relax and reduce stress.</p>
	<p>SAFETY THROUGH DESIGN With no holes to get caught in and our No-Flip(tm) design, Trek Light hammocks are safe for you and your family.</p>
	<p>EXTRA WIDE DESIGN Allows you to lie diagonally (the most comfortable way to relax in a hammock) or invite a friend for an enjoyable two-person hammock experience'</p>
