

Studio MAX

The project is for a comic designer company

The site has to be build for two main languages Dutch and French.

The site must be build up completely in those languages except the administration pages that can be in dutch only.

English can be used as developing language but all buttons and links have to be translated before final fase

Levels

Public (visitor)

Clients and Suppliers

Administration

Public

These visitors have access to all public pages

Clients and suppliers

Clients and suppliers must have a personal ftp area where the can up and download files

Suppliers are designers and color teams that color the actual drawings for the artists since this is a time consuming work. Also printer can be a supplier this way he can easy download the psd files he needs to print.

Clients can preview work

Administrators

They do upload news, agenda and generate page content.

Also they can create new ftp users and webmasters.

Content

The site has to have:

Home page with :

visual input, language selection

news,

agenda, (mini box like lvz?)

Signature dates, general cms handled content

poll

Latest album

General content pages

2 ketjes (two guys)

This page must be a cms editable page with language support.

This page has two sub pages with cms support (personal file on both artists)

Comics

db driven page that presents the different comic lines.

Right now they have 3 comic lines (the adventures of Stam & Pilou (2 kids living in Brussels), The Planckaerts (about a cycling team) and some custom made comics

Selecting one of these categories must lead to a page where all the albums in this category are shown

Projects

Kind of preview page

db driven

This page should show:

Title of the project, short text, 1-2 thumbnails of the project images.

once a project is selected a page with:

Title of the project, Images with for each image a short text

Graphic design

Kind of preview page

On top of the page room for Title and text (short commercial introduction to the studio's work)

db driven

This page should show:

Title (client name), short text, 1 thumbnail of the project images.

once a project is selected a page with:

Title Client name, thumbnails of the different works and for each short text

On click on the image pop-up with larger image

Stamp club

Fck editor page about the collection of stamps page about the collection of stamps

Design studio's

Fck editor page about the days the studio organizes workshops in comic design for kids

Games

2 sub menu's here:

Downloads

on-line games

The download part has pdf and other downloadable files the kids can play off line.

Color plates, diy jobs and so on.

The on line game part has some on-line games

(on-line a combine images game with images of the studio)

Press

Db driven page

On the entrance page thumbnails Title and short description of the article.

(a better and more consistent design than the actual please!!)

One clicked on the thumbnail: editor driven page

Digest (no idea where that came from)

Fck editor page about the who is who in the studio.

Publications

DB driven page with the publications made order by year of publication.

Events.

Full FCKeditable page about upcoming events.

Guestbook

Visitors, can leave comment (censored admin must allow publication notification by e-mail to admin with link to post and allow publication or delete from guestbook button)

Signature dates

List order by date of the days and locations the artist will sign their albums in local bookstores or exhibitions.

These dates are also posted on the home page.

Show only the future dates other dates can be found in the archive

Contact page

A general contact page with fill in forms

Of course with language support and no mail to forms or other spam attractors.

E-mail verification (at least the domain name)

content verification (digits in zip code field), digits in phone and fax.

Spam filtering in the message part.

Gallery.

An image gallery that could be based on the gallery or picassa projects.

Gallery creation uploading images or image folders,

multiple image or folder upload must be possible!
