

Request for Proposal (RFP)

Project Timeline:

Work would commence within 1-2 weeks after completion of the bidding process, and should be completed within 3 weeks of starting.

Project Description:

I am looking to build a simple one page site that would show a Google Map and tags of photos that I upload. In addition, I need a simple webform, accessible only by me, to upload pictures and some details.

Project Components:

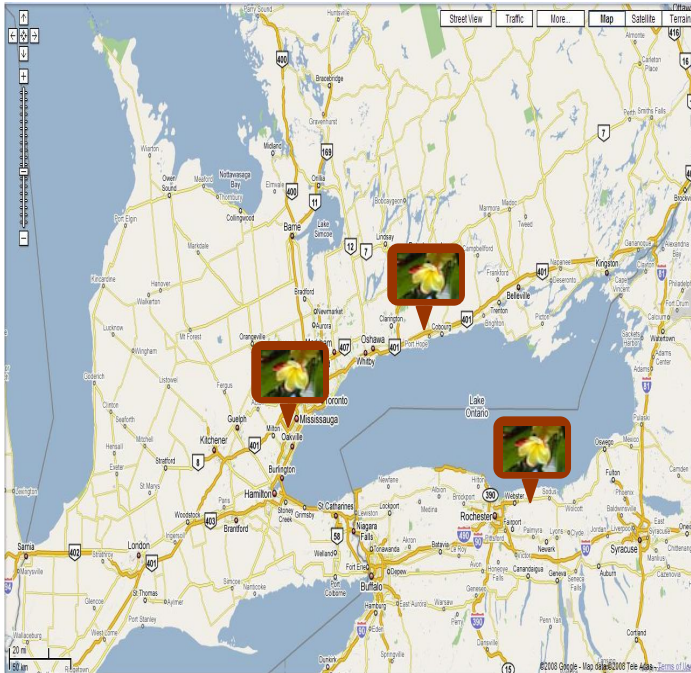

- **Google Map:** A one-page site with a Google Map centered on Toronto, Ontario. Map should fill one-half of the page (see attached drawing).
- **Tagged Photo List:** A list on the remaining one-halves of the page, showing photo title and a small thumbnail of the photo (see attached drawing). Clicking on photo re-centers Google map to display tag. No more than 10 entries are shown per page, with a standard page scroll at the bottom of the photo listing.
- **Upload Webform:** Simple admin panel for me to upload photos from my desktop. Will include fields for title (50 characters), description (500 characters), date (month, day, year, time), coordinates (standard latitude/longitude coordinates used by Google Maps), category (a drop down menu of various options), and location (text field of 50 characters)
- **Photo Management:** simple instructions on how to remove uploaded photos.

References required, including sample of previous works.

Candidate must demonstrate a strong understanding of the English language.

Main Page (Menu Listing)

Webpage Title

We Live Here

Location: Toronto, Ontario, Canada (44.655505, -81.779911)

Date & Time: December 29, 2006 @ 10:10 PM
