

Apex Web Studio – Logo and stationery

I am looking for a high quality feel to the logo and stationery designs and it has to look fresh, modern and professional. You are free to choose the colours that you use. Please note that I will need the logo in .ai and .psd format, and will require the stationery with and without the bleeds in psd, pdf and word document format.

I would really appreciate it if you could provide me with some mockups with your bid, as this will give you an advantage as I can assess your creativity skills. Please also include links to your portfolio. Payment will be made on completion of the project only. I am looking to pay no more than \$40.
