

Website modification-Photography

- 1) You will redesign a simple **logo** that will be used for the banner and business card/office stationary.
- 2) I would like you to redesign **banner** which will have rotating background using a script. The banners must be patriotic-etc. I will provide you with tagline and other details.
- 3) You will modify the **navigation bar** and **formatting, fonts, SEO**.

Build a hidden site map.

4) **User account functionality:** Modify User name and Password creation with forgot password and 3 layer security question to verify user identity before a new pass word is sent. The initial creation of a user account must have this functionality as well.

5) **Blog:** I would like the site users to get a custom blog page which would have the look of my website not a wordpress template. The blog page must have the ability to upload pictures and videos for non commercial purpose i.e. point and click-simple interface and space for advertisement

6) **Weather Widget:** You will add a weather widget on the main page which by default display weather of Washington DC. User should have the ability to change city by using U.S zip codes. (Similar to Windows Vista).

7) **News :** I would like you to write a script which will fetch news and associated photos/videos published on a specific topic/title and populate specific area on my website automatically without any maintenance. I will provide the topic(s).

8) **PHOTO GALLERY & Shopping cart (store front):** I'm a professional photographer. I'd like to sell my photos and calendars on my website with the possibility of adding more items. I 'd like use some space on the home page for the store. A typical example to what I am looking for can be found by visiting the following site: <http://www.kreutzphotography.com/> The feel of website should be user friendly, simple and self explanatory.

I will use PayPal without API to receive payment. You will provide me with the following:

- I. A quick way to load images as thumbnails, with price and image identification number photo gallery so that the customers could place an place order. I am familiar but not an expert on LIGHTROOM, PHOTOSHOP and DREAMWEAVER. I would like to be able to upload the pictures for different events on my own such as in Flickr.
- II. You will present me with a layout. I will provide the rate sheet.
- III. You will set up 8.25 % tax rate for one state.

Website modification-Photography

- IV. You will create shipping and handling option and associated charge field with it.
- V. Educate me in simple plain English, how to add/update the shop on my own (for example adding a new product such as posters or calendars)after the work is done.
- VI. Ability for me to add new categories in the future under the photo gallery such as SPORTS, POLITICS. etc.

9) Minor modifications of the other segments as needed. Such as removing non functional or improper items, or adding documents as privacy policy, terms of use etc.

10) I should be able to modify the entire site or some areas using the DREAMWEAVER 9.0 on my own. The designer should also provide me with complete documentation of the website.

11) Secure the pages after the site is complete and provide me documentation so that I could perform the task in future. Provide me examples of a secure and unsecure page-**CRITICAL ++**.

I have an existing unfinished website that the developer will have to modify. While working on the website you will only display banner with a message "coming soon".

I would like you to finish items 1-7 by January 11, 2009. I will complete testing by January 12, 2009. You will work on item 8-11 and make it fully functional by January 24, 2009. We will finish testing January 27th. Once all of the requirements are met I will release the payment.
