

Scope

For

Kamala Nehru

College

Developed by : **Cybez**

Summary

The main objective to develop this project is to have an interactive website for the current students, ex-students and the faculty of the college.

Functionality

This project will have four kinds of users, namely the current students, the ex students, the faculty (administrator) and the Super Administrator. The functionality of all the kind of users have been described below :

Current Students

The current students will have the following functionality:

1. They can view all the public pages of the website.
2. They can login with a generic username and password to view the Notice Board.

Ex Students

The ex students will have the following functionality:

1. They can view all the public pages of the website.
2. They can fill an online registration form to register themselves in the ex-students database maintained with the college.

Faculty (Administrator)

The administrator will login to the website and will have the following functionality:

1. He can manage his own profile.
2. He can manage the profile of the ex students.
3. He can view/post/delete messages from the online Notice Board.
4. He can manage only the following pages :
 - a. Courses
 - b. Activities
 - c. Societies
 - d. Respective DepartmentsFor eg - if an Admin is authorized to edit only the English Department, then he cannot edit any other department page.
5. He can post/view/delete My Page section which would be specific to that particular faculty.

Super Administrator

The Super Administrator will have the following functionality:

1. He can create and manage the logins/profiles for various Administrators and map them with their respective departments.
2. He can manage his own profile.
3. He can manage the profile of the ex students.
4. He can view/post/delete messages from the online Notice Board.

5. He can manage all the public pages on the website.
6. He can view/post/delete messages from the online Notice Board.
7. He can manage the generic password for student login.
8. He will be able to indentify as to who which Administrator has posted / deleted a particular message on the notice Board and when it has been done.

Navigation Structure

1. The entire navigation is going to be divided into three parts : Top Navigation, Left navigation, Bottom Navigation.
2. All these 3 navigations will have 3 level of links : Main Links, Sub Links, Sub Sub Links
3. The admin and super admin can add/modify/delete the main links, sub links and sub sub links.
4. The front end links will be dynamic and will reflect the links as added in the admin.
5. Whenever a user is on a main link, then its subsequent sub links should be displayed on the left.
6. Whenever a user is on a sub link, then its respective sub sub links should be displayed on the left
7. Whenever a user is on the sub sub link, then its corresponding sub sub links should be displayed on the left.

Current Setup

1. The current site can be viewed at <http://knc.clientapps.info>
2. The admin functionality can be seen at <http://knc.clientapps.info/ui/admin>
 - a. Username : admin, Password : admin
 - b. Username : faculty, Password : faculty
3. The look and feel of the site should remain almost the same, until you have a better layout to show us.
4. The final links and content of every page is being sent in a separate file.
