

# TutorVista - Quotation

---

## Our Vision:

The site will be a service provider that will help students to get tutors as per their requirements. Students can opt for demo classes (to check for offerings), hourly or monthly packages. Tutors will remain online and will receive requests as made by various students. Based on these requests they can start their teaching sessions.

## Modules that will be developed for the site are mentioned below:

### MODULE 1: Homepage design

Designing of crisp professional home page: Complete Home Page Layout, inclusive of:

- Basic Designing
- Good navigation featuring vital links to ensure maximum comfort to the visitor.

#### Other highlights on the home page are:

#### Features

The homepage will have a section on the top which will display the features of the website. Website admin will have provisions to manage the content being displayed in this section.

This section is intended to display the special features and offering of the website. This section will also have a buy now button which will take user to the student registration page.

#### Try Us (Demo Classes)

Home page will have prominent display showcasing the demo classes along with their charges (if any). If admin has set the price for demo classes for 0\$, then it will display free demo classes. There will be a try the demo button, which will take student to the page where he can fill in his basis details and send request for demo class.

#### Find Tutors

There will be a search form on the home page where students can search for tutors according to their grades and subjects. If any tutors are available then they will be displayed, else, appropriate message will be displayed.

#### Benefits

This section will highlight the benefits which students get after joining this website. Content of this section will be managed by website admin.

### MODULE 2: Demo Class

#### What are demo classes?

Demo classes are the teaching sessions between the tutor and the student with relatively lower costs (as

# TutorVista - Quotation

---

managed by website admin.) Demo classes can be used only for a fixed number of times (currently 2 times).

## How can one opt for demo classes?

Students can opt to view demo classes before they actually subscribe for any package. When students opt for demo class, they will be directed to a form where they can enter their basic details. The details form will be similar to one present below:

<b>Your Name</b>	<i>Text field</i>
<b>Email Address</b>	<i>Text field</i>
<b>Grade</b>	<i>Drop down</i>
<b>Course</b>	<i>Text field</i>
<b>Topic</b>	<i>Text Field</i>

When user will submit the form, the request will be displayed in admin panel. Admin can forward the request to any tutor of his choice.

## What will happen in demo class?

Tutors will be able to view the requests. The display of demo requests will be like:

Student Name	Course (topic)	Grade	<b>Demo Requested</b>
Email Address			<u>Start Session</u>

If a student has requested for demo more than 2 times, then his name will come highlighted in red indicating that this student has requested for demo more than permissible limit.

<b>Student Name</b>	<b>Course (topic)</b>	<b>Grade</b>	<b>Demo Requested</b>
<b>Email Address</b>			<u>Start Session</u>

This will be done by tracking IP address of the student. When student will request for demo, then system will record the IP address along with other details and forward it to admin.

Tutors can click on the start session link to initiate the teaching session. Time period of teaching session will not be fixed. Tutor will have to manually close the session and convey same to student before closing the demo class. They may negotiate on the time duration before starting the teaching.

**Q: Please specify whether payments for demo class will be pay after or pay before? We recommend pay before.**

## **MODULE 3: Students**

Students can find tutors and opt for packages as per their interest. There will be 2 types of packages – Hourly Packages and Monthly Packages.

# TutorVista - Quotation

---

## Hourly Packages

Hourly Packages can be accessed by anyone. Means student is not required to register for accessing this package, although he can do so, if he is a regular student and wants to avoid re-filling the forms.

When they will select to go for hourly package, then they will be taken to a form where they can fill in their details like demo class. After that the request will be forwarded to log in tutors. They can see the request and act upon it as required.

Students can make payments for hourly packages in a pay before or pay after method. In pay before, they will have to pay before they can actually start the class. In pay after, they can pay after the class.

## Monthly Packages

Monthly packages can be accessed only after registration. Registered students can login to their folders and start their classes as applicable. For monthly packages, payment method available will be pay before.

## **Module 3.a: Student Registration**

Students can register by filling the following form:

<b>Name</b>	<i>Text field</i>
<b>Grade</b>	<i>Drop down</i>
<b>Course</b>	<i>Text field</i>
<b>Email (Username)</b>	<i>Text field</i>
<b>Password</b>	<i>Password field</i>
<b>Confirm Password</b>	<i>Password field</i>

Student Registration will not be paid. Payment will be made only after they select the package. After registration, student will be taken to a page, where he can select from available packages depending upon his course and grade selection.

## **Module 3.b: Student Folder**

Students will get following access when they login to their accounts:

### **Manage Account Details**

This section will allow student to manage their account details. Email will not be editable as it will be used as username.

### **Change Password**

This section will allow user to change his login details

### **Package Details**

This section will display the packages details like package name, validity (for monthly package only). There will also be a start session link for monthly subscribers. Students will also be able to search for existing packages.

# TutorVista - Quotation

---

## Logout

This section will allow student to close his current session. In order to re-access the account, he needs to login again.

## Module 4: Tutors

Tutors will have a separate sub-domain from where they can login to their accounts. Tutors will be able to access the following from their folders:

### Edit Account

This section will allow tutors to manage their account details.

### Change Login Password

This section will allow tutors to change their login password.

### Teaching Section

This section will allow tutors to view the students who are online and have requested for a class. There will be a start session link which will take tutor to the whiteboard.

**Please note that Whiteboard will be third party software. You will have to arrange for it and its implementation.**

## Logout

This section will allow tutors to close their working session.

## Module 5: Send Request

In case students are not able to find any tutor, or they have any concern, they can fill in a form and forward it to the admin. The form will be similar to one present below:

**Your Name**  
**Email Address**  
**Course**  
**Topic**  
**Comments**

The form will be forwarded to admin. Admin can view the inquiry and forward it to any tutor or reply himself.

## Module 6: Miscellaneous

Users can view static pages (**About us & Contact us**).

**Sitemap** will be provided to present website navigation in a nutshell. User can go to every section from that link.

## Administrative console

### Module 7: Manage Students

This section will allow admin to manage students of the website. Admin can view their details and control their membership status by activating or deactivating the member. Only active students can login to their folders from front end. Admin can also delete a student if required.

### Module 8: Manage Tutors

This section will allow admin to manage tutors of the website. Admin can view their details and control their membership status by activating or deactivating the member.

Admin can add tutors from this section. Tutors additions will ask admin for following details:

**Name**

**Course (text field)**

**Grades (Multiple Selection. It will be a fixed drop down ranging from K.G to 12)**

**Email**

**Password**

**Confirm Password**

This form will create a tutor and will forward the details to tutor on his email id. Tutors can login their folders, using their email and password.

Only active tutors can login to their folders from front end. Admin can also delete tutors as and when required.

### Module 9: Manage Demo Requests

This section will display the requests for demo classes as posted by students. Admin can view the request and allocate a tutor for it. After allocation, tutor will be able to see the request in his teaching zone.

# TutorVista - Quotation

---

## **Module 10: Manage package price**

This section will allow admin to add and manage packages. Packages can be of two types:

- i) Hourly package
- ii) Monthly Package

In hourly package admin will provide following details:

Package Cost

Description

Grade

In monthly package, admin will provided following details:

Package cost

Description

Grade

## **Module 11: Manage Demo Charges**

This section will allow admin to manage charges for demo class. Same will be reflected in the front end (main website) accordingly.

## **Module 14: Manage Inquiries**

This section will enlist all the inquiries sent by various students. Admin can either reply to the inquiry or allocate a tutor for the same. Once allocated, tutor will be able to see the request and correspond with the student accordingly.

## **Module 24: Manage Page content**

Admin will be provided with web editor to manage the content of about us and Contact us page. Admin can enter the content and format it like adding font style, size, bold etc. Admin can also add image to the content.
